Experiment -3

AIM: To create an IAM User using a free tier plan.

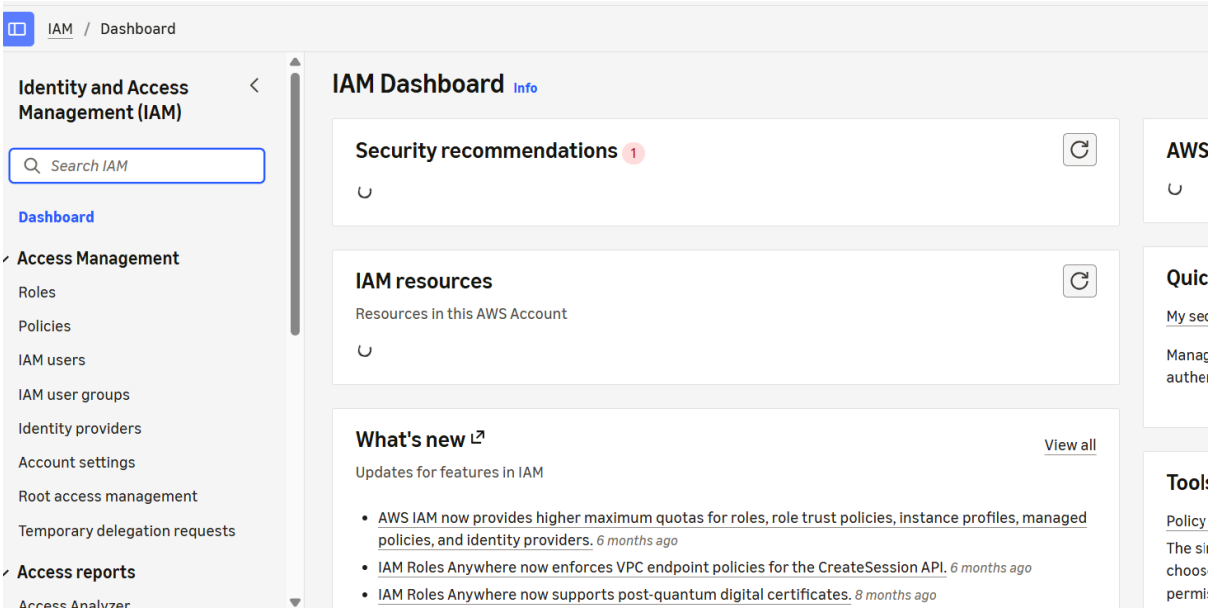

Description:

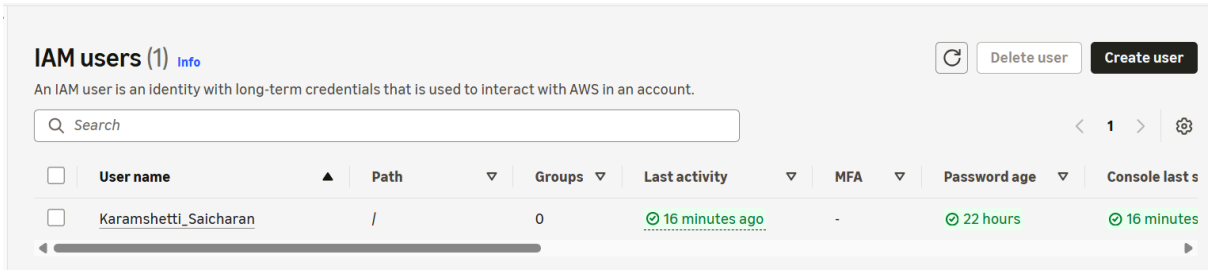

Created an AWS Identity and Access Management (IAM) user to provide secure access to AWS resources. Configured user credentials, assigned appropriate permissions through policies and user groups, implemented security best practices such as password management and multi-factor authentication (MFA), and followed the principle of least privilege to ensure controlled and secure access to cloud services.

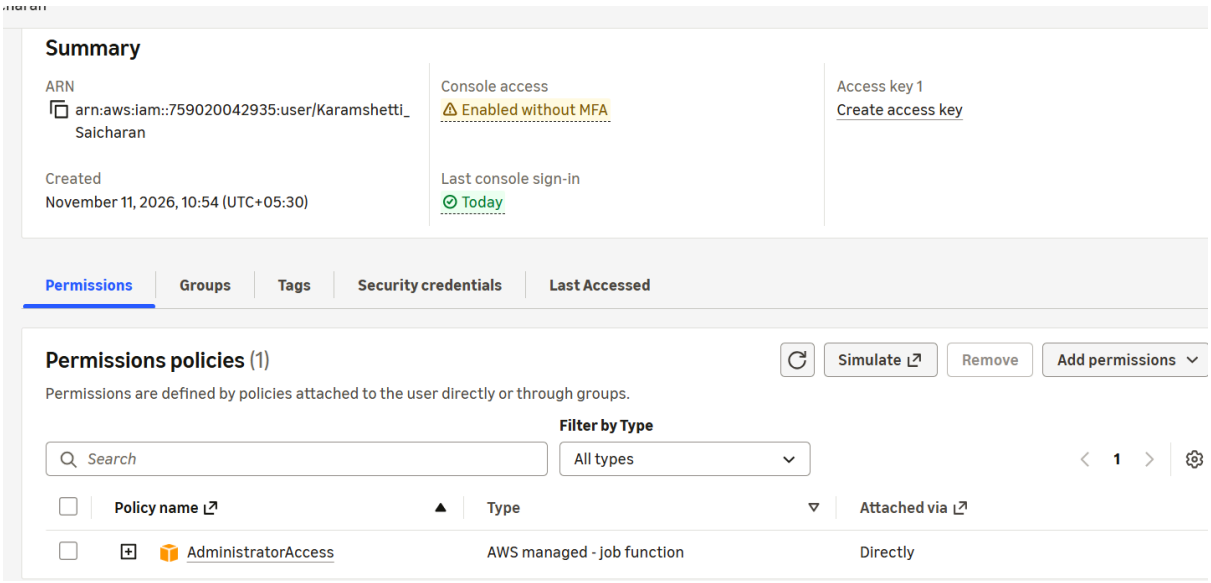

Steps:

1. Sign in to the AWS Management Console.
2. Search for and open IAM (Identity and Access Management).
3. Click Users in the left navigation pane.
4. Click Create user.
5. Enter a User name.
6. Click Next.
7. Assign permissions by adding the user to a group or attaching policies.
8. Review the user details and permissions.
9. Click Create user to complete the process.
10. Choose Custom password → Set a password.
11. Uncheck User must create a new password at next sign-in (optional).
12. Click Next.
13. Select Attach policies directly.
14. Choose AdministratorAccess policy.
15. Click Next → Create user.
16. Download or copy:
    a. Console sign-in URL
    b. Username
